### **About Together Rx Access**

The Together Rx Access Card was created by many of the nation's leading pharmaceutical companies to help hardworking Americans and their families gain access to immediate and meaningful savings on prescription products right at their neighborhood pharmacies. Most cardholders save 25 to 40 percent\* on brand-name prescription products. More than 300 brand-name prescription products are included in the Program.† Savings are also available on a wide range of generics. Medicines in the Program include those used to treat high cholesterol, diabetes, depression, asthma, and many other common conditions. The Together Rx Access Card is free to get and free to use.

Since its inception in 2005, more than two million individuals have enrolled in the Program. Those who have used their Together Rx Access Card have collectively saved nearly \$100 million on their prescription medicines.

To qualify for the free Together Rx Access Card, applicants cannot be eligible for Medicare or have public or private prescription drug coverage. To be eligible, household income of less than \$45,000 for a single person or \$90,000 for a family of four (income eligibility is adjusted for family size) is required.

Together Rx Access also directs individuals to the Partnership for Prescription Assistance (PPA), a clearinghouse for more than 475 public and private assistance programs, including nearly 200 offered by pharmaceutical companies. Those who are eligible for the Together Rx Access Card may qualify for additional savings on prescription medicines, or even free medicines, through other patient assistance programs in the PPA. The PPA also connects people to free health clinics in their community.
